

Message from the CEO on 42nd Foundation Day

Today, as we celebrate the 42nd Foundation Day of C-DOT, we do more than mark a date, we honour a legacy. A legacy of innovation, resilience, and a relentless pursuit of excellence that has shaped India's telecom landscape for over four decades.

Since its inception in 1984, C-DOT has remained true to its mission of building indigenous, innovative, and secure telecom technologies that empower the nation and connect every citizen.

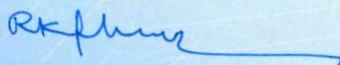

Over the past four decades, C-DOT has not only pioneered pathbreaking solutions for India's unique needs but has also become a symbol of self-reliance and technological excellence. C-DOT has continuously evolved, keeping pace with global advancements while ensuring that the benefits of connectivity reach the last mile.

But our story is not just about technology, it is about people. It is about the millions of lives touched when a remote village connects to the world, when secure networks empower governance, and when innovation brings hope for a better tomorrow. At C-DOT, every solution we create is guided by one purpose: to serve the nation and empower every citizen through connectivity.

As we look to the future, the horizon before us is boundless. With the advent of 6G, AI-driven networks, quantum communication, securing our cyber space and resilient digital infrastructure, we stand at the cusp of yet another revolution. And I firmly believe that C-DOT will continue to lead this transformation driven by our spirit of self-reliance, our commitment to innovation, and our vision of making India a global leader in communication technologies.

On this proud day, I applaud the dedication of every C-DOTian, past and present, whose passion has made this journey possible. I also thank the Government of India, our partners, and stakeholders for their trust and support in this mission of national importance.

Let us move ahead with renewed determination, to build technologies that not only connect India but inspire the world. The future of communication is being written and C-DOT will continue to script it.

Dr. Rajkumar Upadhyay
CEO C-DOT
