

C-DOT DVB-WiFi Gateway

This solution from C-DOT is currently the only Receiver enabling reception of DVB-T/T2 signals from Doordarshan Digital Transmitters to users' mobiles using Wi-Fi without the need for a Broadband backhaul. This has unique features those are presently not available in other receivers for Doordarshan's Digital Transmitters.

This solution can be widely used in moving cars, Buses, Gram Panchayats, etc. for reception of Digital Terrestrial / Satellite signals in a user friendly and in commonly available devices such as Mobiles, Tablets, etc.
